What Are The Elite, Prestige and Royale Packs?

They are electronic, alternative smoking devices that simulate the sensation of smoking. They do not expose the user, or others close by to harmful levels of cancer causing agents and other dangerous chemicals normally associated with traditional tobacco products. The devices produce a realistic simulated smoke which is actually a vapor mist. When exhaled, the vapor harmlessly evaporates in the surrounding air within a few seconds. The basic components of our products consist of a battery, an atomizer, and a flavored cartridge that is filled with propylene glycol, flavoring, varying amounts of nicotine, and a computer chip that controls it all. Both the atomizer and cartridges are considered to be consumables. Cartridges are available in varying amounts of nicotine that include high, medium, low and no nicotine at all. The Elite and Royale feature a longer, more elegant design while the Prestige features a sleeker, smaller design.

How Do They Work?

When the user inhales at the mouthpiece, a small switch is activated and power is delivered to the atomizer. The atomizer creates a vapor derived from the moisture that is found in the cartridge. As the vapor passes through the cartridge, it picks up the nicotine and flavoring and delivers it to the user. The user absorbs the nicotine either through the mucus membranes in the mouth or through the lungs.

What is Nicotine?

Nicotine is an addictive alkaloid that is naturally present in certain plants. A high presence is found in tobacco and a low presence is found in common vegetables such as potatoes, tomatoes and green peppers. Nicotine, when delivered in small dosages such as in a cigarette or cigar can deliver a feeling of calmness or relaxation. Current available information states that nicotine in and of itself has not been shown to cause cancer in healthy tissue. Additionally, it has not been shown to have any mutagenic properties. This being said, it should also be noted that the International Agency for Research on Cancer has not evaluated nicotine as of this time. Nicotine is considered habit forming and addictive.

What Is Propylene Glycol?

Propylene glycol is a food additive found in many foods we eat today. It is used in food coloring, flavoring and also used to keep food, medicines and cosmetics moist. It is considered to be generally safe and it is the element in our product that helps to create the vapor that simulates smoke. It is also used in medical inhalants. Although the FDA considers it as "generally recognized as safe" for use in food, cosmetics and medicines, use of propylene glycol in simulated smoking devices is not currently included in the list of uses generally recognized as safe by the FDA.

How Long Does a Cartridge Last?

For both the Elite and Royale, one cartridge is equal to one pack of

cigarettes (approx.). For the Prestige, one cartridge is slightly less than one pack of cigarettes. Typically, a cigarette will yield about 10 to 12 mouthfuls of smoke. There are twenty cigarettes to a pack, so one might expect about 240 mouthfuls of vapor when using one Elite or Royale cartridge. For the Prestige, one might expect about 150 mouthfuls of vapor when using one Prestige cartridge.

How Long Will The Atomizer Last?

An atomizer is considered to be a semi-consumable, but will operate through the use of many cartridges before replacement becomes necessary. An atomizer needs to be replaced when vapor volume is noticeably reduced even after a fresh cartridge and fully charged battery have been installed. It is important to note that if the atomizer continues to produce a proper volume of vapor, one should continue using it until the volume is decreased to a level that is too low to deliver a satisfying volume of vapor. inLife sells the replacement cartridges in a convenient pack. Extra atomizers can be purchased when needed.

How Long Does a Battery Last?

InLife batteries are rechargeable. A new battery out of the box should be charged a minimum of 9 hours before the first use. After that, a normal charge should only require 2 – 4 hours of charge time. Every Elite, Prestige and Royale Pack come with a charger and one rechargeable battery. A battery will typically last about three days before recharging, although we recommend an overnight charge, just like you would charge your cell phone. A reduced volume of vapor typically indicates that the battery needs to be charged, even though the tip of the battery will still produce a simulated burning ash (or blue light with the Prestige). It is a good idea to purchase an optional, additional rechargeable battery to keep your product working when you need it. Depending on usage, a battery should be useable for about one year before needing to be replaced.

Where May I Purchase Replacement Batteries?

Replacement batteries and other replacement items and accessories are available through this website under "Shop Now".

Who Should Use This Product?

Our products are intended for use by adult smokers. They will not be sold to minors as defined by each individual state.

Please also review our "Product Warning!" below:

Warning! Nicotine is an addictive substance. This product has not been approved by the U.S. FDA as a cessation device and therefore should not be used to quit smoking. This product is not intended to diagnose, treat, prevent, cure or mitigate any disease or medical condition or offer any therapeutic benefit. Do not use this product if you are under the legal age of smoking or if you are sensitive to nicotine or inhalants. Do not use this product if you have or if you are at risk of having any respiratory conditions, heart disease, high blood pressure or diabetes. Consult your doctor before use if you have any medical conditions. Do not use this product if you are pregnant or nursing. Discontinue use of this product immediately if you experience symptoms such as nausea, dizziness, a weak or rapid heartbeat, vomiting, diarrhea or any other negative physical symptom. If any of the aforementioned symptoms occur, seek medical attention immediately. physical symptom. If any of the aforementioned symptoms occur, seek medical attention immediately. Do NOT ingest or touch non-vaporized liquid ingredients in the cartridge. Ingestion of certain pieces may present a choking hazard. KEEP THIS PRODUCT AWAY FROM CHILDREN AND PETS.

Are The Nicotine Cartridges Available For Purchase In a Variety of Flavors?

Yes, currently these flavors include Standard, which taste similar to a traditional cigarette, Menthol, and Robust. We will also be offering other exciting new flavors in the very near future. Keep visiting our web site under "Shop Now" for updates and additions.

Where May I Buy Refill Cartridges?

You can purchase the refill cartridges and additional electronic cigarettes on this website. Or, if you prefer, you can become an Independent Distributor of inLife and participate in the incredible revenue sharing opportunity we offer to any adult who wishes to do so. You can Join here on the website on the main menu of the home page and click on the Join Now Button! You may also contact customer service at (703) 439-0948. They will be happy to speak with you about becoming an inLife Independent Distributor in your area

Is It Less Expensive To Use This Product Than Traditional Cigarettes?

From the standpoint of comparing the cost of a pack of cigarettes to an inLife Elite or Royale cartridge, it really depends on how much one is paying for a pack of cigarettes. It should be noted, however, that an inLife Elite/Royale cartridge, for example, will cost the user approximately \$3.21 U.S.

Can I Smoke it Anywhere?

Given the fact that our products do not utilize burning tobacco, are non-flammable and do not produce smoke, they technically do not fall under the letter of the law that prevents the smoking of tobacco in certain places. Users of our products have reported that they freely use them in restaurants, bars, and many other places where traditional tobacco smoking has been prohibited. Many users of the products have reported that it is not uncommon for someone to approach them when they are using the product. The typical response is either, "What on earth is that?" or, "Sorry, but you can't do that here." A simple explanation and demonstration of the product will usually turn into a friendly discussion about the product. This is an excellent way to introduce others not only to this innovative new product but also to the incredible income opportunity that exists for normal folks who wish to participate in the wonderful revenue opportunity that exists with inLife.

Does the Product Produce Harmful Second-Hand Smoke?

No. The vapor that is released into the surrounding area is

generally harmless and will dissipate in a matter of a few seconds.

Can I Use the Product To Stop Smoking and Is It FDA Approved?

No! Our products are not FDA approved to be used as cessation devices. They have never been tested or proven to be cessation devices and we are not marketing them or selling them for that purpose. We are marketing and selling them to our customers as an alternative to smoking traditional tobacco products. They offer the freedom to be used in most places that currently prohibit the use of tobacco products. They produce no first or second hand smoke. They are virtually odor free and represent an overall lower cost to the user than traditional cigarettes. They help to restore freedom to smoke almost anywhere, anytime and do not lend themselves to creating "social isolation" as one might expect with traditional tobacco products.

Is There a Product Guarantee Offered by InLife?

Yes, with the disposable nature of the cartridges and atomizers, there is a 45 day warranty on the cartridges and the atomizer. There is a six month limited warranty on the battery and charger.

How May I Benefit Financially From Being Involved with InLife?

InLife offers an incredible business opportunity for those who wish to be involved with these amazing and revolutionary new products. A prominent entrepreneur once said that the best way to look for a good business opportunity is to find a recent, technological breakthrough with which to be involved. InLife offers an explosive pay plan, dynamic easy-to-demo products, a fun environment, experienced leadership, and one of the most amazing products to ever hit the direct sales market industry.
